

MEDICAL SPECIALS RECONCILIATION

J. Doe v. Example Freight (SYNTHETIC) | Cited billing and record pages

Prepared for counsel. Subject to review and verification by retaining counsel.

SYNTHETIC SAMPLE. Every provider, payer, person, NPI and amount is invented, and the bills, remittances, ledgers, letters and records are synthetic. ICD-10-CM descriptors are real code-set text read from the ICD-10 code connector; CPT descriptors are short paraphrases; the Florida checklist tracks Fla. Stat. 768.0427(3) as read at flsenate.gov on Sept 23, 2026. Every page reference below is a live link to the cited page, bundled behind this summary.

What this is, and what it is not

This is a transcription and reconciliation of the billing pages produced, with each figure tied to the page it came from. It states what the documents show. It gives no opinion on reasonable value or usual and customary charges, on whether any code was proper, on upcoding or unbundling, or on which figure is recoverable or admissible. The identical-line flag is exact matching only. No lienholder or adjuster was contacted.

Totals by provider

Lien claimed for Medicare-paid lines is the conditional payment for that line; for the LOP provider it is the unpaid balance. The two are different kinds of claim and are shown together only as a list.
